

## Calendula

**Light:** Full Sun to part Shade

**Timing:** Direct sow after last frost.

**Plant seeds** 1/2" deep and 6" apart

**Watering Requirements:** Well draining soil. Calendula thrive in slightly cooler areas and benefit from light fertilizing.

**Size:** Height 12" - 18" tall with a 12" spread. Can be grown in containers.

**Bloom time:** 6 to 8 weeks after starting seeds. Blooms continue all summer into early fall if you deadhead regularly.

**Tinctures of calendula** are very calming to dry chapped or irritated skin.
